

## Fork Positioner type IFPRT-S

For Reach Trucks with existing side shift and carriage tilt

Pin type attachment with a frame designed to fit on top of the existing side shift. The attachment has a very good visibility due to the compact cylinder design and no components in the centre of the frame. The cylinders has a built-in valve which offers outstanding synchronization for the fork positioning.

### Advantages

- Pin type
- High residual capacity
- Low weight
- Uses original wear parts
- Good view
- Easy to mount
- Only requires one additional hydraulic function
- Retains all original features and functions of the original carriage

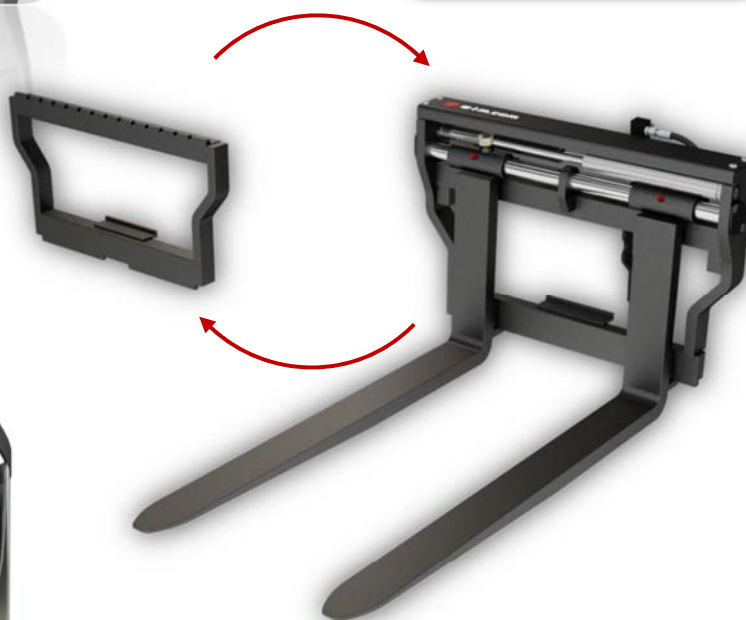

## Fork Positioner type IFPRT-S
